

Welcome to Doremi Pianos

Doremi Japan began business as a piano string maker in the 1950's and began rebuilding used pianos for the Japanese market in the 1970's. In 1996 we began exporting our "A" grade pianos to the USA, primarily to wholesalers. Our United States office opened in 2001 in order to better supply our U.S. customers directly from Japan.

Music retailers throughout America have discovered the advantages of having an ongoing supply of like new Japanese pianos for sale to their customers at very reasonable prices.
